

This document should be complete by all partners, and should identify potential mitigations for barriers identified through the scoping exercises:

- The Desk Based Review
- The Stakeholder Survey and
- The Partner Visit

The below should outline the specific barrier, a brief description, as well as what the potential mitigations may be. These should be grouped thematically, with an example being found in each section below. The complete mitigations in relation to this project can be found in the toolkit.

Regulatory and Legal

Barrier	Brief description	Potential Mitigations

Financial and Economic

Barrier	Brief description	Potential Mitigations

Operational and organisational

Barrier	Brief description	Potential Mitigations

Pedagogic/Academic

Barrier	Brief description	Potential Mitigations

Technological

Barrier	Brief description	Potential Mitigations

Security and Risk

Barrier	Brief description	Potential Mitigations

Perception and Recognition

Barrier	Brief description	Potential Mitigations

Environmental and Sustainability

Barrier	Brief description	Potential Mitigations
Environmental footprint of travel	Travel for set-up and QA adds environmental impact (noted as a factor).	<ul style="list-style-type: none"> • Use virtual platforms for meetings, quality assurance, and administrative coordination to reduce international travel. • Establish Robust Quality Assurance (QA) Frameworks with regular monitoring and evaluating programs to ensure sustainable environmentally friendly standards are maintained by each party.
